

# RAIL

*Railway from east to west and back again. We ship your company's logistics back and forth by rail, with the perfect compromise between price and transit time.*

# RAILWAY IS THE GOLDEN MIDDLE WAY TO AND FROM CHINA

## WILL YOUR COMPANY'S LOGISTICS ALSO BE GOING BY RAIL?

Are your products going to or from China? Do you think air freight is too expensive and sea freight too slow? Then railway is the perfect compromise. Much cheaper than air freight, much faster than sea freight.

We offer LCL and FCL shipments via train to and from China through our own offices in China. We offer total train solutions from door to door, complete with document management and consolidation of LCL and FCL containers.

## THERE ARE MANY ADVANTAGES TO GETTING ON THE TRAIN

With up to three weekly departures and 16 days' delivery time for containers between China and Europe, our train solution is a very flexible form of transport that match the needs of most companies:

- Several weekly departures with 2 different connections to Europe
- High delivery reliability, at par with air freight
- Handling of the shipment from door to door
- High capacity and security
- Consolidation of own containers
- Possibility of purchasing full commodity insurance without excess throughout the shipment
- Stable rates and internationally acclaimed service

## PAY FOR THE EXACT SERVICE YOU NEED – NOTHING MORE AND NOTHING LESS

We can handle the entire process, from beginning to end. For example, we can pick up your goods from the manufacturer, supplier or your own warehouse.

We can ship to and from all countries all over the world – and deliver all the way to your shop or to the end user's doorstep. Together, we will find the exact service combination you need.

## 20 DAYS FASTER THAN BY SHIP

We can transport containers between China and Europe in 16 days from the city of Chongqing through Kazakhstan, Russia, Belarus, Poland and to Germany. This is up to 20 days faster than the container shipping companies.

## CELEBRITIES ALSO GO BY RAIL

Rail transport is an internationally recognized transport solution that is used weekly by major international companies such as Apple, BMW and Colgate.

## VIRTUALLY EVERYTHING ON BOARD

There is virtually nothing we cannot transport effectively from A to B: Textiles, hanging garments, boxed goods, refrigerated goods, pharmaceuticals, consumer electronics, appliances, machines and much more.

## WE MAKE IT PERSONAL

The better we know you, your company and the value chain, the better we can optimize the logistics for the benefit of all parties. With us, effective solutions and personal service are essentially two sides of the same coin.

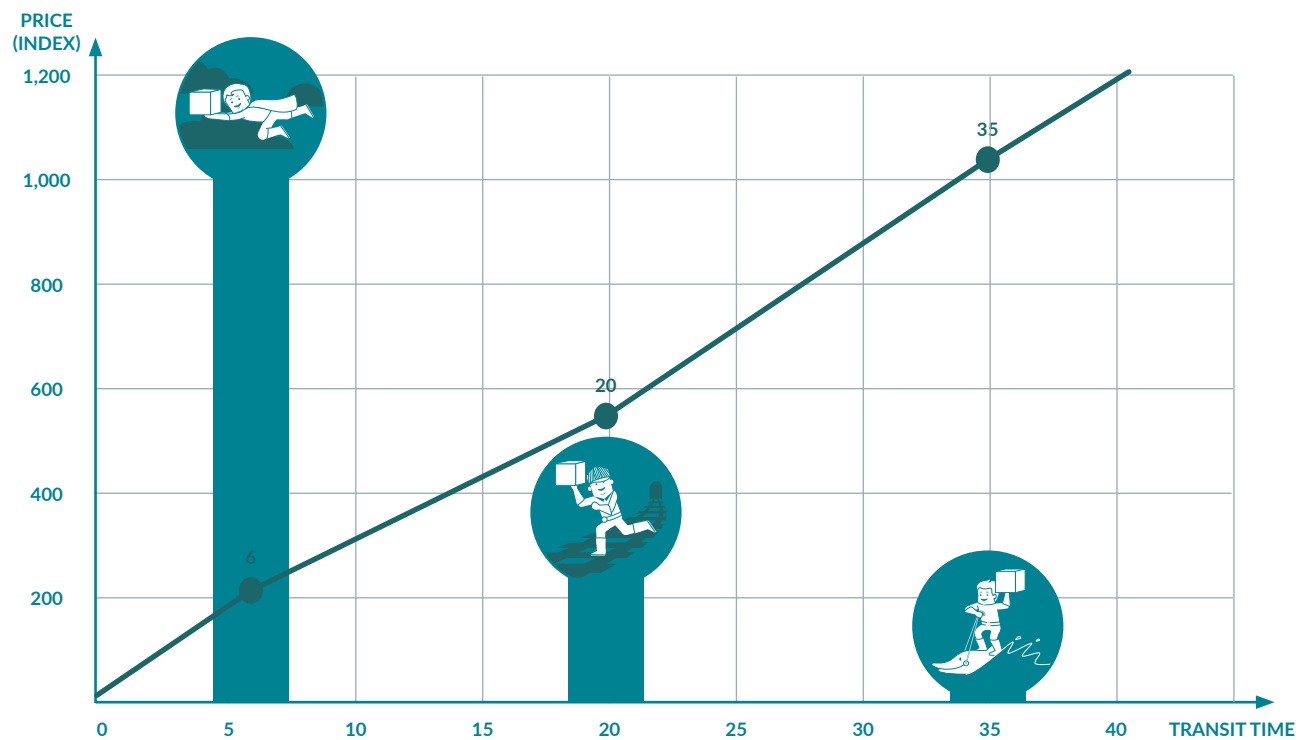

## CHINESE INFRASTRUCTURE RUNS ON RAILS

As companies move into the country, new logistical challenges arise for China. Thus, at these days, China is investing heavily in the railway infrastructure to bring growth to all corners of the gigantic nation.

## RAILWAY IS MAKING WAY FOR NEW MARKETS

The railway entails more flexibility for Danish companies. It provides the possibility to move into new markets, ones which have previously been uncompetitive due to shipping costs.
